Miller Xenon[®] Permanent Horizontal Lifeline System

Miller Xenon[®] Permanent Horizontal Lifeline System

Overview

Feedback

CUSTOM ENGINEERED SYSTEM

Xenon Permanent Overhead Horizontal Lifeline Systems are custom engineered systems designed to be used if the application requires the lifeline to be positioned overhead beyond the user's reach.

Hands-free fall protection

Whether it's along a rooftop: inside an arena or high atop a suspension bridge: this system provides "hands-free" fall protection for a variety of configurations: straight or curved: multiple bends: floors: ridgelines or frontal posts. A uniquely-designed shuttle connector automatically bypasses intermediate supports without disconnecting from the lifeline: increasing mobility and promoting worker safety.

Simple and Versatile

Because of its versatility: simplicity and minimal maintenance: a Xenon System is the perfect solution for engineers: architects and contractors to provide secure safety access on new buildings: industrial sites: railcars: pipe racks: arenas: bridges: etc.

Features & Benefits:

- Easy installation — either in-house maintenance personnel under the supervision of an installation technician: or by a certified Xenon installer
- Stainless steel components withstand harsh environments
- Söll System Design Software calculates specifications for any application: easy to navigate and available in multiple languages
- Worker attaches using a shock-absorbing lanyard and full-body harness

Xenon Overhead Shuttle: 25223/

Double-locking mechanism simple enough to operate with one hand. Stainless steel construction with no moveable parts: ideal for harsh: highly-corrosive environments.

4-in-1 Shock Absorber

Serves as shock absorber: turnbuckle: tension indicator and fall indicator: provides easy and safe access/exit.

Intermediate Brackets

May be replaced without disassembling or replacing the stainless steel cable.

Product Number

SKUs

SKU	Description
1005709	Xenon Automatic Pass-through Shuttle - provides smooth passage through intermediate brackets
1010609HW	HRDWR XENON INTERMEDIATE BRKT
1014934	Xenon Multifunction Shock Absorber - Provides four functions in one unit. It absorbs energy, has a turnbuckle mechanism for tensioning, tension indicator to show when properly tensioned and fall indicator to show someone has fallen into the system
22609-H5	8mm End Swage 501208d
22611-H5	8mm Cable Splice 1006704
23806	8mm Single Point 90 Corner
23820	XENON ID PLATE
24596	Overhead Shock Absorber
25098	Long Line Tensioner
26350	Multi Angle Overhead Bracket
